

Power Analyzer / Digital Power Meter

Yokogawa WT 3000

- highly accurate power and efficiency measurement

Specification:

- basic measurement accuracy: 0.01 % of measured value
- frequency range 0.1 Hz bis 1 MHz
- 4 input channels
- signal analysis, FFT-analysis, flicker analysis, cycle-by-cycle meas. Function
- Storage of sampled signal data
- interfaces: Ethernet, RS-232, USB, GP-IB

Source: Yokogawa

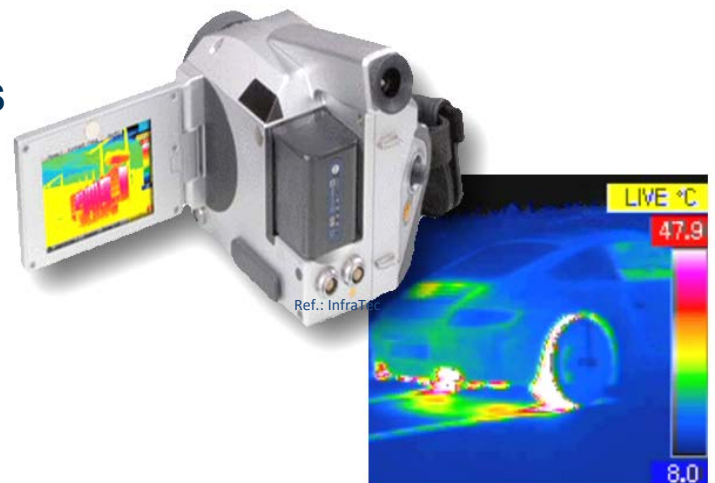

Thermography System

InfraTec VarioCAM hr Inspect 680 S

- analysis of surface temperatures in dynamic and static processes

Specification:

- resolution (detector) 640x480 pixel
- spectral range 7.5...14 μm
- meas. range -40...1200 $^{\circ}\text{C}$
- thermal resolution <0.03 K
- Recording with 0.25...60 Hz
